CPP Assignment #3

Learn Object-Oriented design method

1. Read cppstyle.pdf file to learn cpp coding style.

2. Read iterator.pdf to understand iterator design pattern.

3. Design a double-linked list class with iterator class. Use BOUML to create a project.

4. Define a Data class with one integer member.

5. Write a test program and put some Data objects into the list. Coding under eclipse IDE.

6. Talk with people in your group, what is your design opinion.
